

# World-class Hosting Service

## *The etrials Advantage*

etrials' application hosting services go beyond standard hosting by providing a holistic solution to essential business continuity, resiliency and security.

etrials has invested heavily to help you attain the peak performance your trials need to always be running quickly, efficiently and in a security-rich and industry-compliant environment.

Recognizing your critical need to access trial data at any time and in virtually any location around the world, etrials' has assembled a highly talented team of IT professionals. Having successfully implemented more than a thousand trials, you can rely on our proven experience and certified technical knowledge to support your trial environments.

Managed by Peak10, a recognized leader in IT site services, our data center facility is able to ensure the network is highly available, reliable, redundant and secure. The data center is fitted with the latest hardware and software platform technology, disaster recovery and is configured for scalability. etrials manages your eClinical platform and applications to ensure consistent and reliable performance, while maintaining operations under virtually any condition.

### **etrials' Highly Robust Hosting Services Help Ensure:**

Trial downtime is mitigated with state-of-the-art disaster recovery systems

- Critical systems, IT processes and networks are highly available
